THE STORY - LUCCA 1942

The first U-BOAT watch was created 20 years ago by Italo Fontana inspired by a model designed in 1942 by his grandfather Ilvo, for the Italian naval military forces, but never produced. It was an impressive diving watch characterized by the crown for the hands positioning placed on the left side. By perfecting and implementing the technical features of the U-BOAT watches, Italo Fontana has succeeded in creating a unique style and capturing the wrists of many celebrities.

INSPIRATION AND CREATIVITY

U-BOAT, relying on the Tuscan designer's dynamic creativity, has developed, in addition to the iconic crown on the left, a series of innovations such as the use of tungsten, the hardest of all materials, as well as the introduction of a patented system for the crown releasing from its stop position.

CAPSOIL

OIL IMMERSION

CAPSOIL overcomes the boundaries of traditional design by combining innovative lines with a retro taste. The Swiss electromechanical movement is completely surrounded by a low viscosity lubricating oil. The oily liquid wraps around the dial and turns it into an absolute black making it three-dimensional and deep.

This fluid creates a compensation bubble always on the move, as well as offering a surprising amplified vision of the hands, which seem to float free as in the absence of glass.

CAPSOIL

TITANIO DLC

PRICE:

REF. 8896

LIMITED EDITION 150 UNITS

Resistance, lightness and the Oil Immersion concept. The innovative concept of Oil Immersion, characteristic of the CAPSOIL line, meets titanium, one of the most resistant materials in the world and at the same time one of the lightest.

MOVEMENT

swiss electro-mechanical movement lubricated through an oil bath, personalized to UBOAT specifications. Working between 0°/+60° when not worn.

FUNCTIONS

hours, minutes, seconds, chronograph, screw crown.

CASE

in titanium with subsequent black DLC treatment, completely filled with a special oil that emphasizes the dial, creating the illusion of the absence of glass, and an optical effect of a more intense black and higher legibility. Visible air bubble on the dial to compensate the temperature variations. Distinguishing crown on left side. 45 mm diameter.

BACK

innovative locking system (Locking Ring System) with quick battery replacement.

DIAL

two superimposed layers, black. Hands, numbers and indexes treated with superluminova in beige colour, visible tightening screws. Metal plate screwed to the dial.

CRYSTAL

high quality curved sapphire.

WATER RESISTANCE

100 mt, 10 ATM.

STRAP

ultra-resistant vulcanised rubber, in black color. Tongue buckle in titanium with subsequent DLC treatment.

Width: 22/20 mm.

STRAP: ref. 3001/Z - BUCKLE: ref. 5459/DLC/SCREWS
