FIRST CLICK

POSITION 1 to charge and start the watch, turn the crown  clockwise
NEUTRAL POSITION

POSITION 2 Extract the crown  to bring it to position 2. Turn the crown  clockwise to set the desired time.
FIRST CLICK

Push the crown  back in to position 1.

1. Innovative locking system with compartment for quick battery change. 

2. Internal oil closing and regulation system, for the exclusive use of technicians U-BOAT specialized. 

Nota: the oil inside the case may undergo a slight change in tone due to the natural change of the liquid.

CARE AND MAINTENANCE

- Your watch will maintain its performance intact for a long time, with the right care.
- We recommend having your watch checked every 2 or 3 years of our dealers. Authorized/Authorized Service Center, to carry out normal maintenance of all mechanical parts and waterproofing.
- The photochromic dial is designed to maintain its adaptive performance for at least 2 to 4 years, under normal use. The photochromic properties do not technically expire, but the ability to darken and lighten may gradually decrease. Constant exposure to direct UV light causes premature aging of the photochromic material. Avoid exposing the watch to very intense heat and high temperatures.
- It is recommended to unscrew the crown when the watch will not be used for a long time, to limit battery consumption. For battery replacement we recommend contact an authorized center.

OPTIMAL CONDITION OF FUNCTION: 0° / +60°C.
