RACING INSPIRED

This exclusive DBF001-10 flyback chronograph from DuBois et Fils blends eye-catching design with state-of-the-art technology. Produced in a limited edition of just 33 pieces, the watch's striking color combination is a reference to the legendary Gulf racing teams and the golden age of auto racing of the 60's and 70's. The 41.5 mm stainless steel case houses an automatic ETA base caliber 2892, which is supplemented with the Dubois-Dépraz module caliber 44500, resulting in a twin-disc large date and a chronograph mechanism with flyback function and stop times of up to 12 hours.

VINTAGE PATINA

U-Boat's natural bronze 46 mm case is pre-aged for that vintage look. The bezel and the back of the case are locked together by external tubing that ensures absolute water resistance to 10 ATM. An Oversized "cup" crown is secured to the left at 9 o'clock for comfort and convenience. Two superimposed dials, one treated with composite pigments with laser cut counters and hours, the other in matt bronze. The bronzed sapphire glass front is curved and flat sapphire back reveals the customized mechanical movement. An innovative steel crown release system at 8 o'clock adjusts both the time and date setting functions.

BOUTIQUE EXCLUSIVE

Created exclusively for Ulysse Nardin Boutiques, the new Marine Chronometer Series was designed with the hard-wearing individual in mind. The 99-piece limited edition comes in a 45 mm case with high-tech "Blaktop" coating, providing additional hardness for lasting durability and ultra-scratch resistance. The watch is powered by the UN-118 caliber, conceived and executed fully in-house, and featuring the signature anchor escapement. Retail price is \$11,800.
